To Hiring Manager,

PricewaterhouseCoopers International Limited,

Bengaluru, Karnataka, India

Subject: Application for Advisory - Cyber Security Risk & Regulatory (Entry Level) Position

Dear Hiring Manager,

I am pleased to be applying for the Advisory - Cyber Security Risk & Regulatory (Entry Level) Position at PricewaterhouseCoopers International Limited. I am keen to use my hands-on Internships and training experiences, technical knowledge and analytical skills to serve better in your organization.

By participating in different trainings and internships, such as my experience as a Cybersecurity Trainee at Purplesynapz and virtual intern at AICTE and Hackveda Limited, I have gained expertise in defensive as well as offensive security, and SIEM tools such as AlienVault OSSIM. My exposure to penetration testing tools such as Burp Suite, Nmap, and Metasploit has enabled me to build a solid base in ethical hacking and vulnerability assessment. As a fresher, I also have basic level knowledge in cybersecurity frameworks such as NIST RMF, NIST CSF, and OWASP principles, and this has reinforced my capacity for evaluating and eliminating security threats.

Additionally, through the official ISC2 Certified in Cybersecurity (CC) training, I developed a deeper understanding of key cybersecurity domains, that includes security principles, incident response & business continuity, risk management, network security and security operations. The training sharpened my ability to apply security controls and understand the lifecycle of managing cybersecurity risks. Furthermore, the Google Cybersecurity Professional Certificate— Course 1: Foundations of Cybersecurity and Course 2: Managing Security Risks—provided me with practical knowledge in identifying common cyber threats, understanding asset protection strategies, implementing basic access controls. These courses have significantly strengthened my fundamental security knowledge and enhanced my risk assessment and mitigation skills.

My interest in cybersecurity goes beyond the classroom. I have worked on hands-on projects, such as creating a Python-based port scanner and a Bash script for discovering network hosts. Additionally, my certifications in Linux Security, Cyber Forensics, and Advanced Wireshark prove my dedication to ongoing learning and skill development.

I really want to join PWC International Limited because my qualification, my passion and area of interest completely aligns with the company's goal of IT security and its image for innovation in cybersecurity solutions and its dedication to protecting digital assets. I am excited to bring my technical skills and flexibility to assist your team in detecting and preventing security threats. I believe that my passion for cybersecurity, coupled with my analytical mind and problem-solving skills, will make me a great asset to your team.

I appreciate the chance to explain how my experiences and abilities can serve your requirements. Thank you for your consideration and time. I await your reply.

Sincerely,

Ankit Raj
